## **PROPOSAL FOR BOARD OF MANAGEMENT**

### **1.0 Purpose**

The purpose of this paper is to request approval from the Board of Management (BOM) on application of system development project on Lean Management: Improving Process Efficiency on Governance Documents Towards International Standard Requirement for Sedafiat Sdn Bhd by using operating budget.

### **2.0 Background**

Lean Management is an applied methodology and techniques that cause work tasks in a process to be performed with minimum of non-value adding activities resulting in reduce waiting time, queuing time, administrative time, and delays. It also focuses on tracing waste and non-value-added products. The lean philosophy emphasizes creating more value for customers with fewer resources through optimizing the flow of work. The outcome is a more organized where employees have access to tools they need and empowered to deliver delightful customer service. At the end, it can give an impact on cost savings due to efficient processes and workflows and leads to profitable business results. Lean Provides services and deliver product with the optimal use of resources, including time, money, and people.
