Executive Summary

The purpose of Preliminary Productivity Report

- Constructs an initial appraisal of the company's overall "performance" & "health", from a productivity angle
- Deploys metrics, to measure productivity and utilization of key resources e.g. manpower, financial, fixed assets
- Graphical representation of trends over a 5-year period
- Serves as "starting point" for company to decide to conduct further diagnosis, suggests options for possible improvements
- Enhance understanding and cooperation between Malaysian private and public sectors to improve productivity growth

Recommendations & Next Steps

- Company and MPC/MEPN mutually agree and determine scope of follow up actions
- Construct a productivity improvement plan, determine resources and assistance available to execute plan that is consistent with Malaysia Business Excellence & Industry4WRD frameworks
- Assist with incentives available under MPC/MEPN initiatives
- Build case study as "success story"

MEPN WG2 – questions leading to next steps

- Which areas Coraza would like to focus on to achieve improvements?
 - Reducing production costs?
 - Ability to meet delivery deadlines?
 - Labour content appears to have gone up in recent years?
 - Investment of fixed assets appears slower than number of employees, intentional?
- What is Coraza's overall strategy in automation?
 - is this an area of priority?
 - Backroom vs shopfloor?
 - Industry4.0 agenda?
 - Maintenance and downtime management?
- Agree on priority for follow up action.....

Consultation with Numac Machinery Sdn Bhd
