APPENDIX I : LETTER OF ACCEPTANCE

APPENDIX II : PROPOSED ACTION PLAN

1. INTRODUCTION

Lean Management is an applied methodology and techniques that cause work tasks in a process to be performed with minimum of non-value adding activities resulting in reduce waiting time, queuing time, administrative time, and delays. It also focuses on tracing waste and non-value-added products. The lean philosophy emphasizes creating more value for customers with fewer resources through optimizing the flow of work. The outcome is a more organized where employees have access to tools they need and empowered to deliver delightful customer service. At the end, it can give an impact on cost savings due to efficient processes and workflows and leads to profitable business results. Lean Provides services and deliver product with the optimal use of resources, including time, money, and people.

2. OBJECTIVES AND BENEFITS

- 2.1 Understand the scope and breadth of a Lean Management initiative.
- 2.2 Understand the concept of tools required in identifying organisational value and waste.
- 2.3 Understand the importance of lean in improving business performance and process efficiency.
- 2.4 Understand the lean fundamentals and apply basic lean analysis and business process.
- 2.5 Identify opportunities and problem areas within existing business.

3. METHODOLOGIES AND SCOPES

- 3.1 Consists of the following modules:
 - a) Briefing and brainstorming on improving governance document (1 day)
 - b) Workshop on Understanding Management System Requirement and document mapping (2 days)
 - c) Workshop on reviewing Standard Operating Procedure (SOP), Key Performance Indicator (KPI) and normative reference information (2 days)
